Cindy,

Here is the updated Volumetric Ranking for all Generators remaining in the database with transactions indicating an EPA Hazardous Waste Code. The text in Red indicates we do not have a manifest for that party. Please note that Pilot Industries remains in that group.

Based on your last message, my understanding is that EPA only wants the top 8 or 10 parties in the WIL, which means I will cut the other parties out of the main database and save those transactions elsewhere. The WIL containing **only** the generators you name will be put on a CD and 8 copies burned on Monday.

Please let me know where you want this cutoff.

Thank you.
